

RMS 10.0 Bullets

Help Text Added to Shipment Conditions Screen

Help text has been added to the Shipment Conditions screen. When you press the **Alt+F1** keys, a list of shipment conditions along with descriptions, valid values, and format will appear. (RMS 2098)

New Reversal Description Added for 417 Replacement

When you replace an estimated 417 with a new 417, the description of the reversal will now read "Reversed by Replacement Waybill." (RMS 2252)

Waybill Links to Trial Balance List

A new option has been added to all trial balance list screens that will allow you to view the waybill associated with each entry. When you enter **W=Waybill** next to a car, the waybill information appears. (RMS 2255)

Review Indicator Changed for Days until Settlement Report

Previously, the Days until Settlement Report did not include any waybills with messages marked as reviewed when determining settlement status. To improve reporting accuracy, if some waybills for an URRWIN are marked as reviewed but some are not, the report will process all waybills but flag the report as partially reviewed. If all messages for an URRWIN are marked as reviewed, the report will process as previously. (RMS 2263)

ENS Charges for Multi-car Waybills

When calculating ENS charges for multi-car waybills, the charge will be calculated by multiplying the single car rate by the number of cars in the multi. (RMS 2271)

Enhance SWC Select Screen for rating process

When you are selecting an SWC to apply to a waybill and call up the list of available SWCs by entering ? in the SWC field, the information displayed now includes the *Consignee* and *Shipper* to make it easier to identify and choose the proper SWC. (RMS 2274)

Bill Quantity Used for Per Car Rate on Multi-car Freight Bill

Freight bills for multi-car waybills using per car rates will now use the bill quantity rather than lading quantity when displaying the number of cars for which the per car rate is applied. (RMS 2281)
